- Proficiency in specific frameworks (e.g., React, Django, Symfony).
- Database administration (e.g., MySQL, PostgreSQL).
- Infrastructure skills (e.g., Docker, AWS, Linux).
- Web development for sites and applications.
- Scripting for automation.

### PROFESSIONAL HISTORY

#### Full Stack Developer

Auryn Soluções Web To Print | 2022 - 2024

Working as a full-stack developer, I contribute to the development and maintenance of the system following the Kanban methodology.

Additionally, I actively participate in the Support and Sales teams, assisting in the training of new team members and conducting meetings with clients to showcase the platform.

#### Lead Full Stack Developer and Team Leader

Pixel Labo | 2024

Currently leading a team of 7 individuals, our goal is to introduce an online photo printing platform to the market.

With the homologation date set to begin in 04/2024, we utilize efficient technologies to deliver a quality product. This includes React/Next.js on the frontend, Django on the backend, and Docker, Terraform, RabbitMQ, Redis, PostgreSQL, AWS services, CI/CD for overall infrastructure.

#### Freelancing

Working as a freelancer, primarily through client referrals who have appreciated my work.

### EDUCATION AND TRAINING

#### UNINTER

##### Software Engineering

07/2023 - 07/2028

##### Analysis and Systems Development

05/2022 - 06/2023 (Course enrollment suspended)
